DETAILED ACTION

This is a first office action on the merits of patent application S. N. 10/644,697.

Priority

Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 2, 4, 6-8 are rejected under 35 U.S.C. 102(b) as being anticipated by Rist ('302).

Rist ('302) discloses a friction clutch (Fig. 2), a housing arrangement (A, B), an axis of rotation, an intermediate plate arrangement with a pair of tow intermediate plate elements (14A, 14B), two frictional output members (12A, 12B), an elastic pre-stressing arrangement with a cup spring (15), a recess/abutment, and frictional surfaces.

Allowable Subject Matter

Claims 3, 5 and 9 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Cooke ('432), Miller ('817), Davies et al. ('501), Becker ('864), Smith et al. ('233), Lucien et al. ('693), Beccaris ('620), Forsythe et al. ('428), Cucinotta et al. ('497), Avers

('035) and Tscheplak et al. disclose other clutch devices having multiple intermediate plate members and/or an elastic pre-stressing arrangement.
